SUMMARY

As a Full Stack Developer & Mobile Developer My expertise lies in harnessing the 5+ years experience in JavaScript frameworks such as React.js, Next.js and React Native allowing me to craft responsive and user-centric mobile experiences in several field such as Ecommerce & Financial, Education & Culture, Real Estate & Sightseeing etc. Throughout my career, I have successfully led a variety of projects from concept to launch, demonstrating my ability to collaborate with cross-functional teams, optimize development processes, and deliver quality solutions that exceed client expectations. Looking to connect with fellow professionals and explore new opportunities that push the boundaries of mobile development and innovative web application development.

SKILLS

React.js, React Native, Next.js, Vue.js, Nuxt.js, JavaScript, TypeScript, Tailwind, Antd, Material UI, PHP, Laravel, Node.js, Express.js, Nest.js, Python, Django, Flask, ASP.NET, ASP.NET MVC, ASP.NET core, Flutter, MySQL, MongoDB, PostgreSQL, Google APIs, OpenAI, Restful APIs, GraphQL, AWS, GCP, Microsoft Azure, Git, Jira, Agile, Netlify, Vercel, Ecommerce, Mobile Development

EDUCATION

- 03/2016 - 06/2020 • Master of Science in Computer Science
Beijing, China **Singapore Institute of Technology**

EXPERIENCE

- 01/2022 • Full Stack Developer
New York, United States **Magneto IT Solutions**
 - Developed scalable web applications using React.js, Next.js, Laravel, Node.js, ASP.NET and Python, resulting in a 30% increase in application performance through optimized responsive user interfaces with Tailwind CSS.
 - Collaborated with cross-functional teams to deploy applications on Azure, GCP, and AWS, enhancing the deployment process and achieving a 40% reduction in downtime during releases.
 - Integrated third-party APIs including OpenAI API and Google API, driving a 15% increase in user engagement and a 20% rise in user satisfaction scores, as measured by user feedback surveys.
 - Developed RESTful and GraphQL APIs with ASP.NET, Django and Flask, facilitating 100% seamless data communication between frontend and backend services, which led to a reducing average response time by 25%.
 - Managed database systems such as MySQL, PostgreSQL, and MongoDB to ensure data integrity and optimal performance, reducing data retrieval times by 25%.
- 08/2019 - 12/2022 • Frontend Developer & Mobile Developer
Singapore, Singapore **EchoGlobal**
 - Contributed to the development of dynamic web applications, successfully migrating 5 legacy applications to a modern tech stack, resulting in a 40% reduction in security vulnerabilities through the implementation of industry best practices and rigorous code reviews.
 - Developed and maintained 3 cross-platform mobile applications using React Native, achieving a 30% increase in app performance through optimized responsive designs for iOS and Android, leading to improved user engagement as evidenced by a 25% rise in user retention rates.
 - Designed and implemented high-quality responsive interfaces for both iOS and Android, enhancing user experience and contributing to a 15% improvement in app store ratings.
 - Integrated 8 RESTful APIs and third-party API, enhancing app functionalities including push notifications, real-time data synchronization, and user authentication so increased 50% in user interaction with the app features.
- 09/2017 - 07/2019 • Internship A3Logics
Singapore, Singapore **A3Logics**
 - Assisted in the development and maintenance of 10+ responsive and user-friendly web applications using HTML, CSS, JavaScript, and frameworks such as React.js and Vue.js, resulting in a 30% increase in user engagement and a 25% improvement in load times.
 - Utilized Git for version control in a team of 8 developers, managing over 500 commits and ensuring a smooth workflow during bi-weekly development cycles, which resulted in a 15% reduction in merge conflicts.
 - Conducted testing and QA for over 200 features, identifying and resolving bugs and discrepancies before launch, achieving a 99% bug-free release rate.
 - Gained hands-on experience with backend technologies, including PHP and Laravel, developing APIs that handled 1,000+ active user requests daily, and utilized Node.js along with MongoDB, optimizing data retrieval times by 35%.
